

# HOW TO IDENTIFY the FIVE SALMON SPECIES found in the KODIAK ISLAND/ALASKA PENINSULA AREA

## KING (CHINOOK) SALMON:

Blue-gray back with silvery sides. Small, irregular-shaped black spots on back, dorsal fin, and usually on both lobes of the tail.

Black mouth with **black** gums at base of teeth on lower jaw. →

Spawning king salmon adults lose their silvery bright color and take on a maroon to olive brown color.

## CHUM (DOG) SALMON: Dull gray back

with yellowish-silver sides. No distinct spots on back or tail. Large eye pupil—covers nearly the entire eye.

Spawning adults develop olive green coloration on the back with maroon sides covered with irregular dull red bars. Males exhibit many large canine-like teeth.

## COHO (SILVER) SALMON: Greenish-blue

back with silvery sides. Small black spots on the back, dorsal fin, and usually on upper lobe of tail only.

Black mouth with **white** gums at base of teeth on lower jaw. ←

Spawning coho salmon adults develop greenish-black heads and dark brown to maroon bodies.

## SOCKEYE (RED) SALMON: Dark blue-black

back with silvery sides. No distinct spots on back, dorsal fin, or tail.

Spawning sockeye salmon adults develop dull green colored heads and brick-red to scarlet bodies.

## PINK SALMON (HUMPIES):

Very large spots on the back and large black oval blotches on both tail lobes. Very small scales.

Spawning adults take on a dull gray coloration on the back and upper sides with a creamy white color below. Males develop a pronounced hump.
